EXPLORING BOTANICALS

The Motto 'Save The Planet' has never been so important and we continue to be focused on doing ALL WE CAN to be responsible for OUR environment.

In 2022 we highlighted the use of Lemons in our drinks - Whether as a base flavour, a juice or a garnish, this citrus fruit is used in high quantities and as it is grown in so many more countries than other fruits, it does not have to travel so much..... This is better for the environment!

So, for New Year 2023, our teams have created some spectacular drinks allowing us to keep up our commitment to the planet as well as offering you a New Year with some New tastes.....

THANK YOU for helping us realise 'OUR' commitment to **SAVE THE PLANET!**

And, if you want to help us reduce waste further, you can always 'ask' us to hold your garnish. Most of the fruit we garnish our drinks with are thrown away afterwards.
